If the shipment of the Sale Contracted goods is prevented or delayed in whole or in part by reasons of war, earthquake, flood, fire, storm, heavy snow etc. of Force Majeure, neither the Seller nor the Buyer shall be liable for late delivery or non-delivery of the Sale Contracted goods. However, in such a case, the Seller shall immediately advise the Buyer by Fax/Telex and email of the accident and airmail to the Buyer, within five (5) working days after the accident occurring, a certificate of the accident issued by the Competent Government Authority or the Chamber of Commerce which is located at the place where the accident occurs as evidence thereof. If the above-mentioned situation and its consequences last for more than two months, or if it is apparent that they will last for more than two months at the outset of the situation, the parties shall enter into negotiations with a view to finding an acceptable alternative to the performance of the contract. A party who is unable to perform its obligations under this contract shall immediately inform the other party of the beginning and end of the circumstances preventing the performance of its obligations.

ARTICLE 7:ARBITRATION:

All disputes arising from or in connection with or in violation of the contract of sale and purchase between the buyer and the seller shall be settled by China International Economic and trade arbitration and shall be governed by Chinese law.

ARTICLE 8:NOTE:

(1)This Sale Contract is accepted to be signed via fax.

(2)If a term of this "Sale Contract" conflicts against Incoterm 2020, the term of the Sale Contract shall be applied.

(3)Gas cylinders are classified as hazardous goods subject to jurisdiction-specific regulatory oversight. Any gas cylinder intended for use in a particular country or region must first obtain certification and inspection approval from the relevant regulatory authorities in that jurisdiction. For example:

- Gas cylinders intended for the United States or Canada must be certified by the Department of Transportation (DOT) or Transport Canada (TC).
- Those intended for the European Union must comply with the Transportable Pressure Equipment Directive (TPED) or the Pressure Equipment Directive (PED), depending on their specific application.
- For the United Kingdom, certification under the UK TPE, PESR, or PED standards is required.
- For South Korea, approval must be obtained from the Korea Gas Safety Corporation (KGS).

Gas cylinders that have not undergone the necessary certification and inspection for a specific country or region are prohibited from being distributed or sold in that jurisdiction. Additionally, cylinders that have not undergone third-party inspection, even if considered standard in their country of origin, may not be accepted in the destination country unless explicitly recognized by its authorities.
