

PROFILE

Certified and experienced .NET Developer & Technical Trainer with 3.5 years of hands-on experience in ASP.NET Core, C#, Entity Framework, and SQL Server, along with 2+ years of experience in technical training and mentoring aspiring developers. Adept at delivering practical training sessions, developing real-time projects, and bridging the gap between academic learning and industry expectations. Proven ability to balance training responsibilities while contributing to real-time software development projects.

SKILLS

- Languages: C#, SQL, JavaScript, TypeScript
- Frameworks: ASP.NET Core, ASP.NET MVC, Entity Framework Core, LINQ
- Front-End: Angular, HTML5, CSS3, Bootstrap
- Database: SQL Server, Stored Procedures, Views, Triggers
- Tools: Visual Studio, SSMS, Postman, Git, Swagger
- Concepts: REST API, MVC, Dependency Injection, Repository Pattern
- Cloud & Hosting: IIS, Azure (Basics)
- Version Control: Git, GitHub, Azure DevOps

AWARDS

- Employee of the month Award, KNILA IT Solutions 2023
- Month of Recognition Award, KNILA IT Solutions 2023

Kowsalya

DOTNET DEVELOPER

WORK EXPERIENCE

.NET Developer | Ad Hash Technologies | Coimbatore

- Developed backend services using ASP.NET Core Web API for the MyHealthAI application to handle patient records and user requests.
- Designed and implemented RESTful APIs for data operations like patient registration, symptom tracking, and appointment scheduling.
- Integrated SQL Server as the backend database, creating tables, views, stored procedures, and writing optimized queries.
- Built user-facing components using Angular, including patient dashboards, doctor views, and search/filter UI.
- Implemented CRUD operations in Angular and connected them to backend APIs using HttpClient.
- Used Entity Framework Core for database interaction and followed Repository Pattern for clean code structure.
- Designed JWT-based authentication for secure login and user session management in the web application.
- Integrated OpenAI ChatGPT API into the Angular frontend to provide Agent-based AI with Augment AI / ChatGPT.
- Used RxJS and Angular services for handling asynchronous data from APIs and updating UI reactively.
- Used Git for version control and worked collaboratively with the team using GitHub branches and pull requests.
- Applied form validations in Angular to ensure data integrity, deployed the solution on AWS cloud platform and collaborated in an Agile environment with sprint planning, stand-ups, and task tracking using Jira.

.NET trainer | Knila IT solution | Coimbatore

- Deliver training sessions on various aspects of the .NET framework including C#, ASP.NET , .NET Core, MVC, Entity Framework, and related technologies.
- Design, develop, and update training materials, presentations, and exercises to ensure relevance and effectiveness in teaching .NET concepts and best practices.
- Facilitate hands-on labs and coding exercises to reinforce learning and enable participants to apply theoretical knowledge into practical scenarios.
- Tailor training programs to meet the specific needs and skill levels of diverse audiences, such as beginners, intermediate developer transitioning to .NET.
- Provide constructive feedback and assessments to participants to track their progress, identify areas for improvement, and ensure learning objectives are met.
- Stay abreast of the latest developments in the .NET ecosystem including new features, tools, and best practices, and incorporate relevant updates into training content.
- Support and guidance to participants by answering questions, addressing challenges, and providing additional resources to foster continuous learning.
- Collaborate with other trainers, developers, and stakeholders to align training objectives with organizational goals and ensure consistency in training delivery across teams.
- Gather feedback from participants and stakeholders to evaluate the effectiveness of training programs and identify areas for improvement.
